

Differing from our regular KG programming, the Little Explorers will embark on a field trip each week. In the winter time, we may go on fewer field trips, depending on weather and mood of the class. Our field trips will immerse the children in a forest-type setting, and give the children the opportunity to draw upon the forest directly for inspiration and discovery. We will also be able to learn first hand about the flora and fauna of our surrounding forests.

Little Explorers program runs from 9am-12:30pm (Mon-Fri), with an option for extended days until 2:30pm.

“LITTLE EXPLORERS” KINDERGARTEN

Join us for the Little Explorers Kindergarten! This class will be open to four, five and six year olds, Mondays through Fridays. This program will have many parallels to our traditional, Waldorf-inspired early-childhood programs. Our days will follow regular rhythms, in-tune with the natural progression of the seasons. Children will have ample time for imaginative play, the cornerstone of our programs, as well as a daily Circle, storytime, rest, snack, and outdoor play. Children will have the opportunity to work on a handcraft, help with classroom care, and snack preparation during playtime each morning.

A curriculum based on imaginative play and meaningful work helps to establish a strong foundation for the growing young child. Children will learn how to communicate with one another, and how to work through conflicts. Children will learn from experience how to treat others with kindness, care, and respect. Children will strengthen their limbs as they work and play, and simultaneously strengthen connections in their brains that will prepare them for later academic success. The child’s sense of wonder will be nurtured through exploration of nature, attention to seasonal changes throughout the year, and reverence for the beauty in everyday life.
